

Live Chat & Polls Window

Customising the Sli.do Player

Multi-Media Livestream Solutions

Custom Theme

Set brand colours

- The primary colour is the header and the secondary colour will be the button colour.

Custom theme

Set your custom colors for participant mode

Primary color

#7ec1c4

Secondary color

#000000

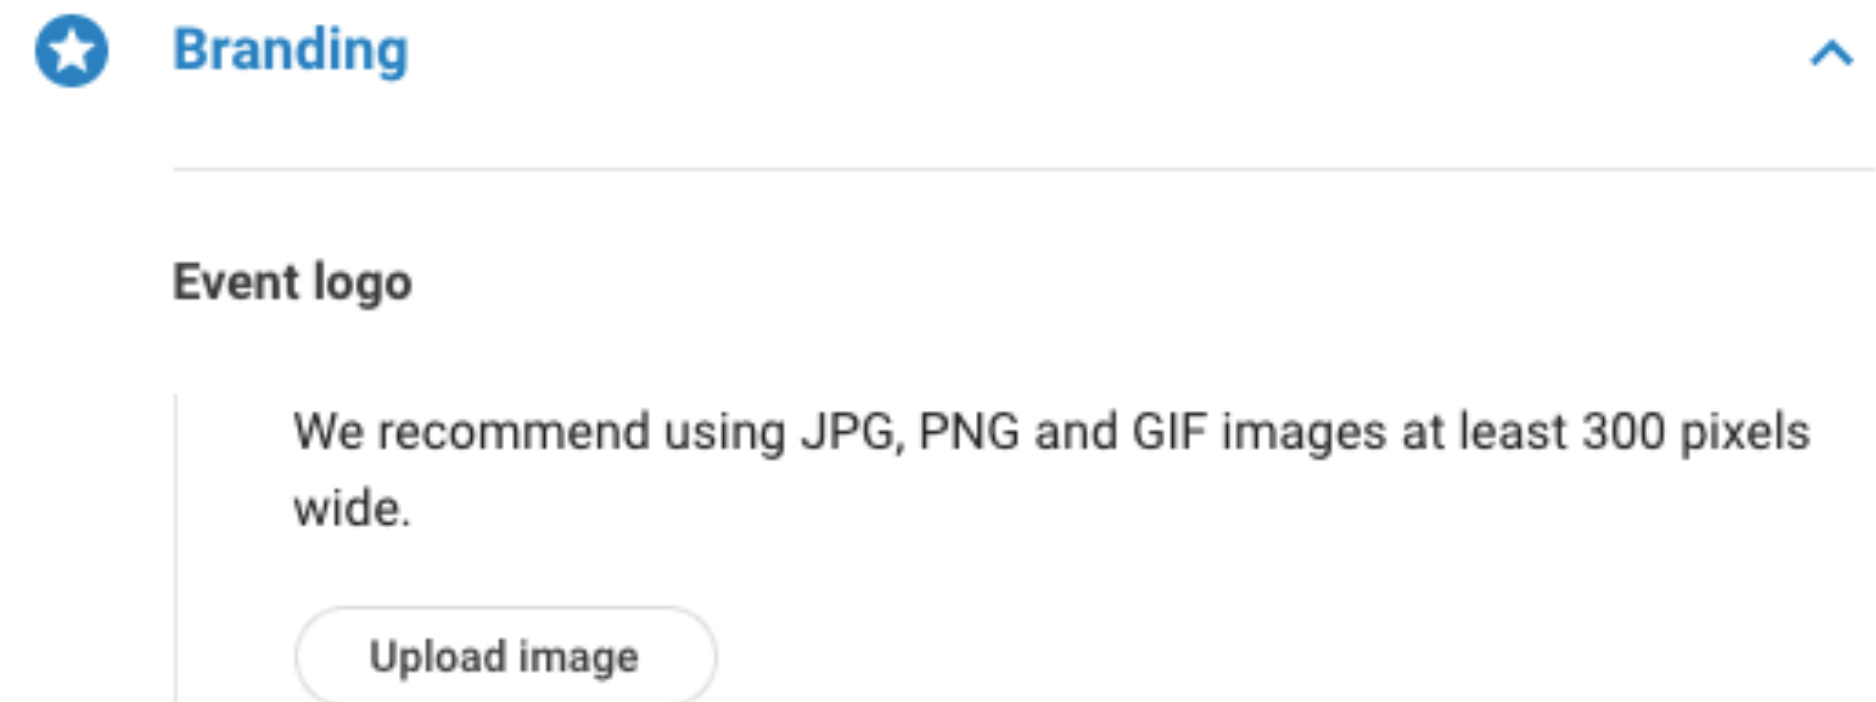

For best results, we recommend using 2 dark colors.

Logos

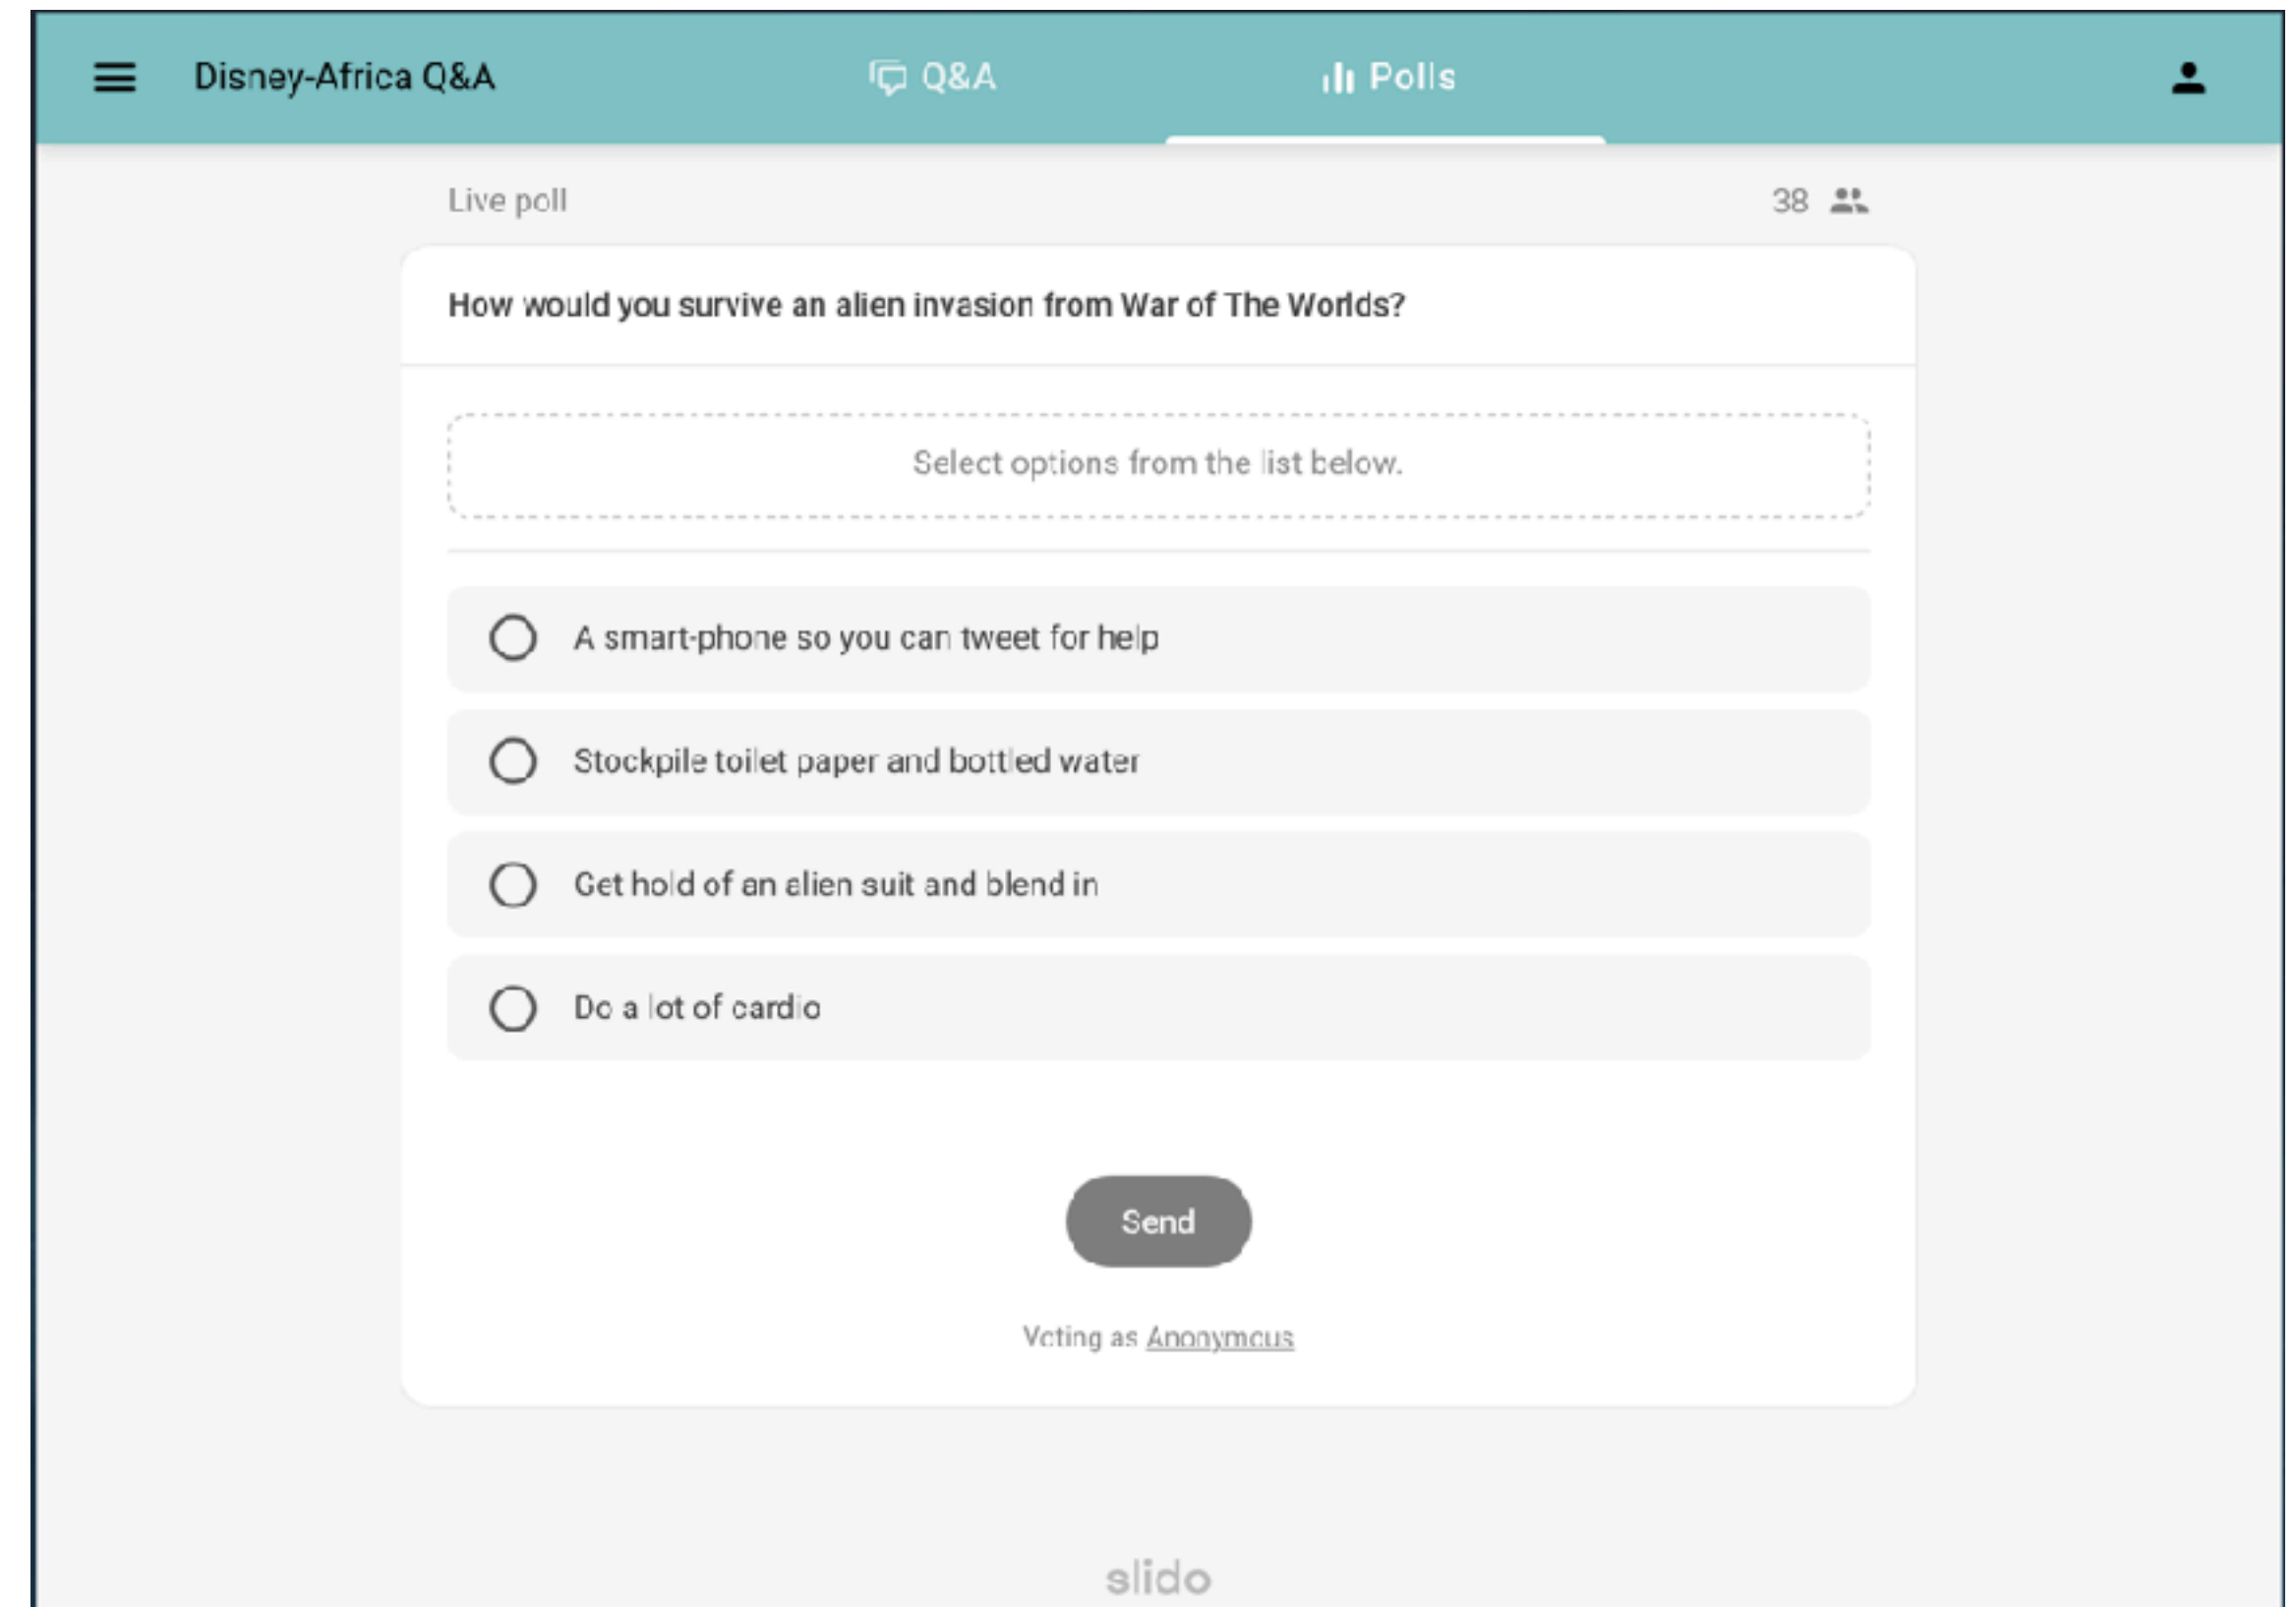

Event Logo

- Each event can have an event logo.
- We recommend using an aspect ratio of 1.15 : 1 for the event logos. A great example would be an image 250 px wide and 217 px high.

Polls Unanswered

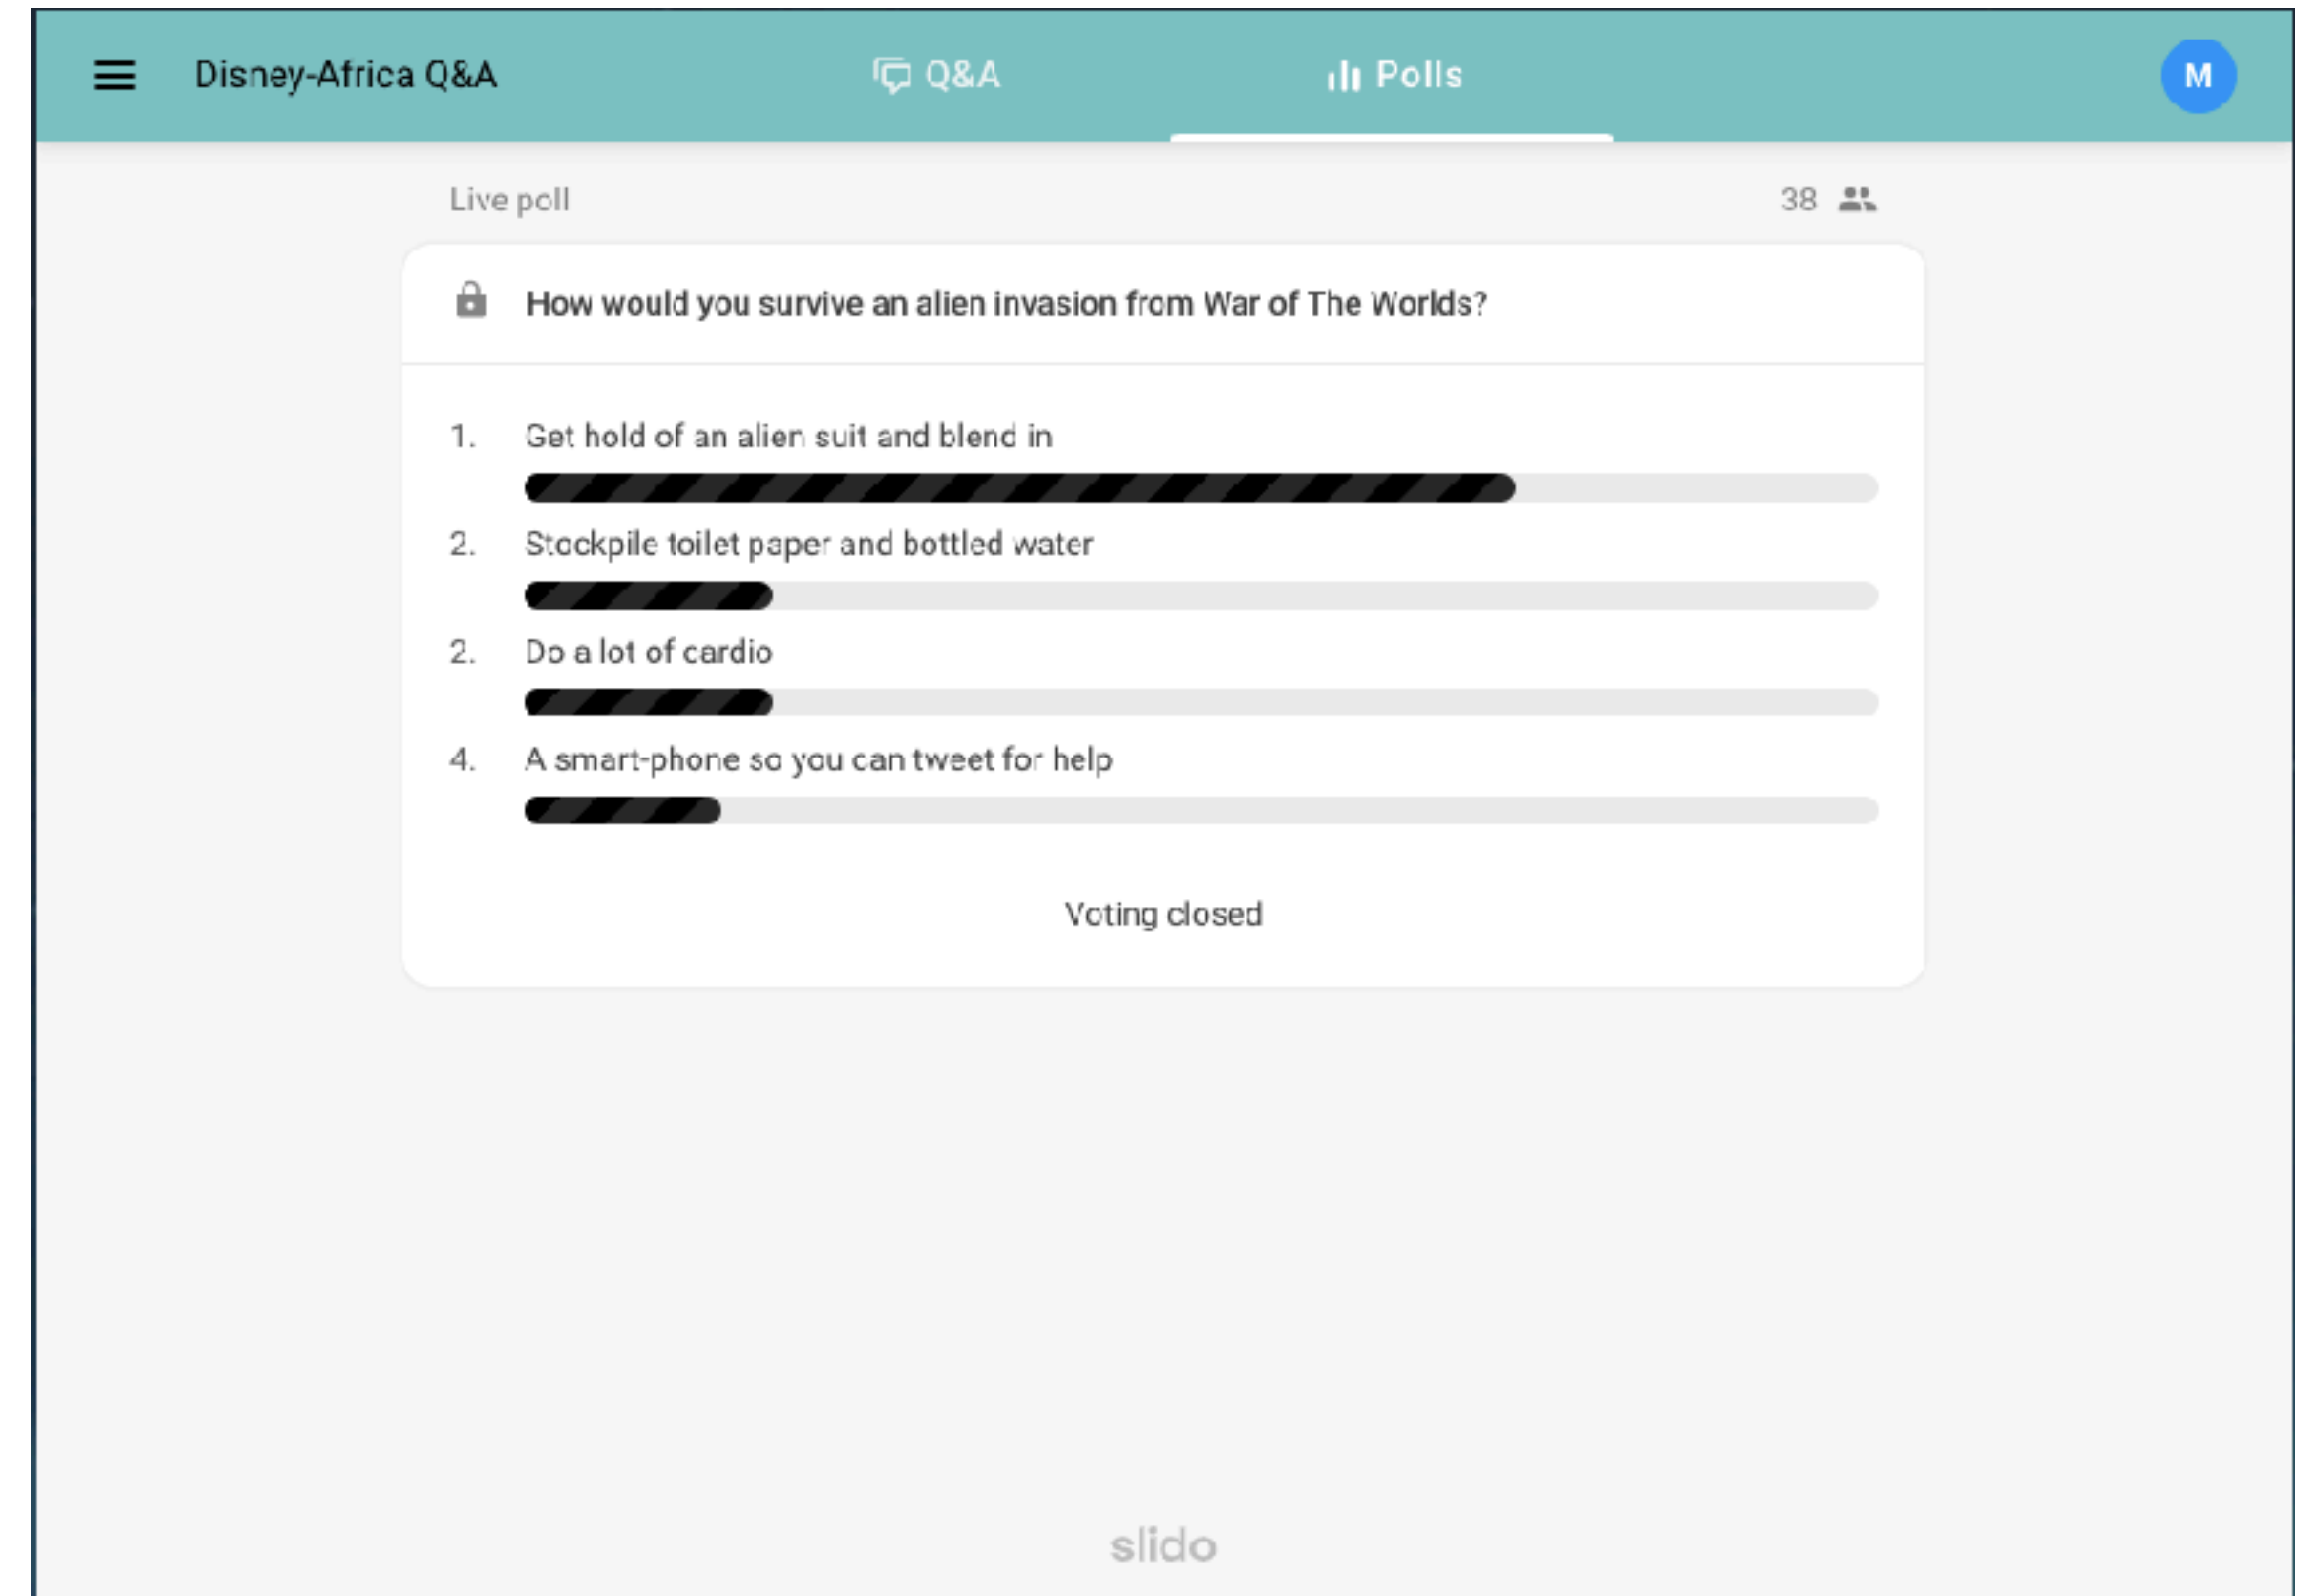

- The unanswered polls display in this grey theme colour and cannot be customised.

Poll Answers

(Optional)

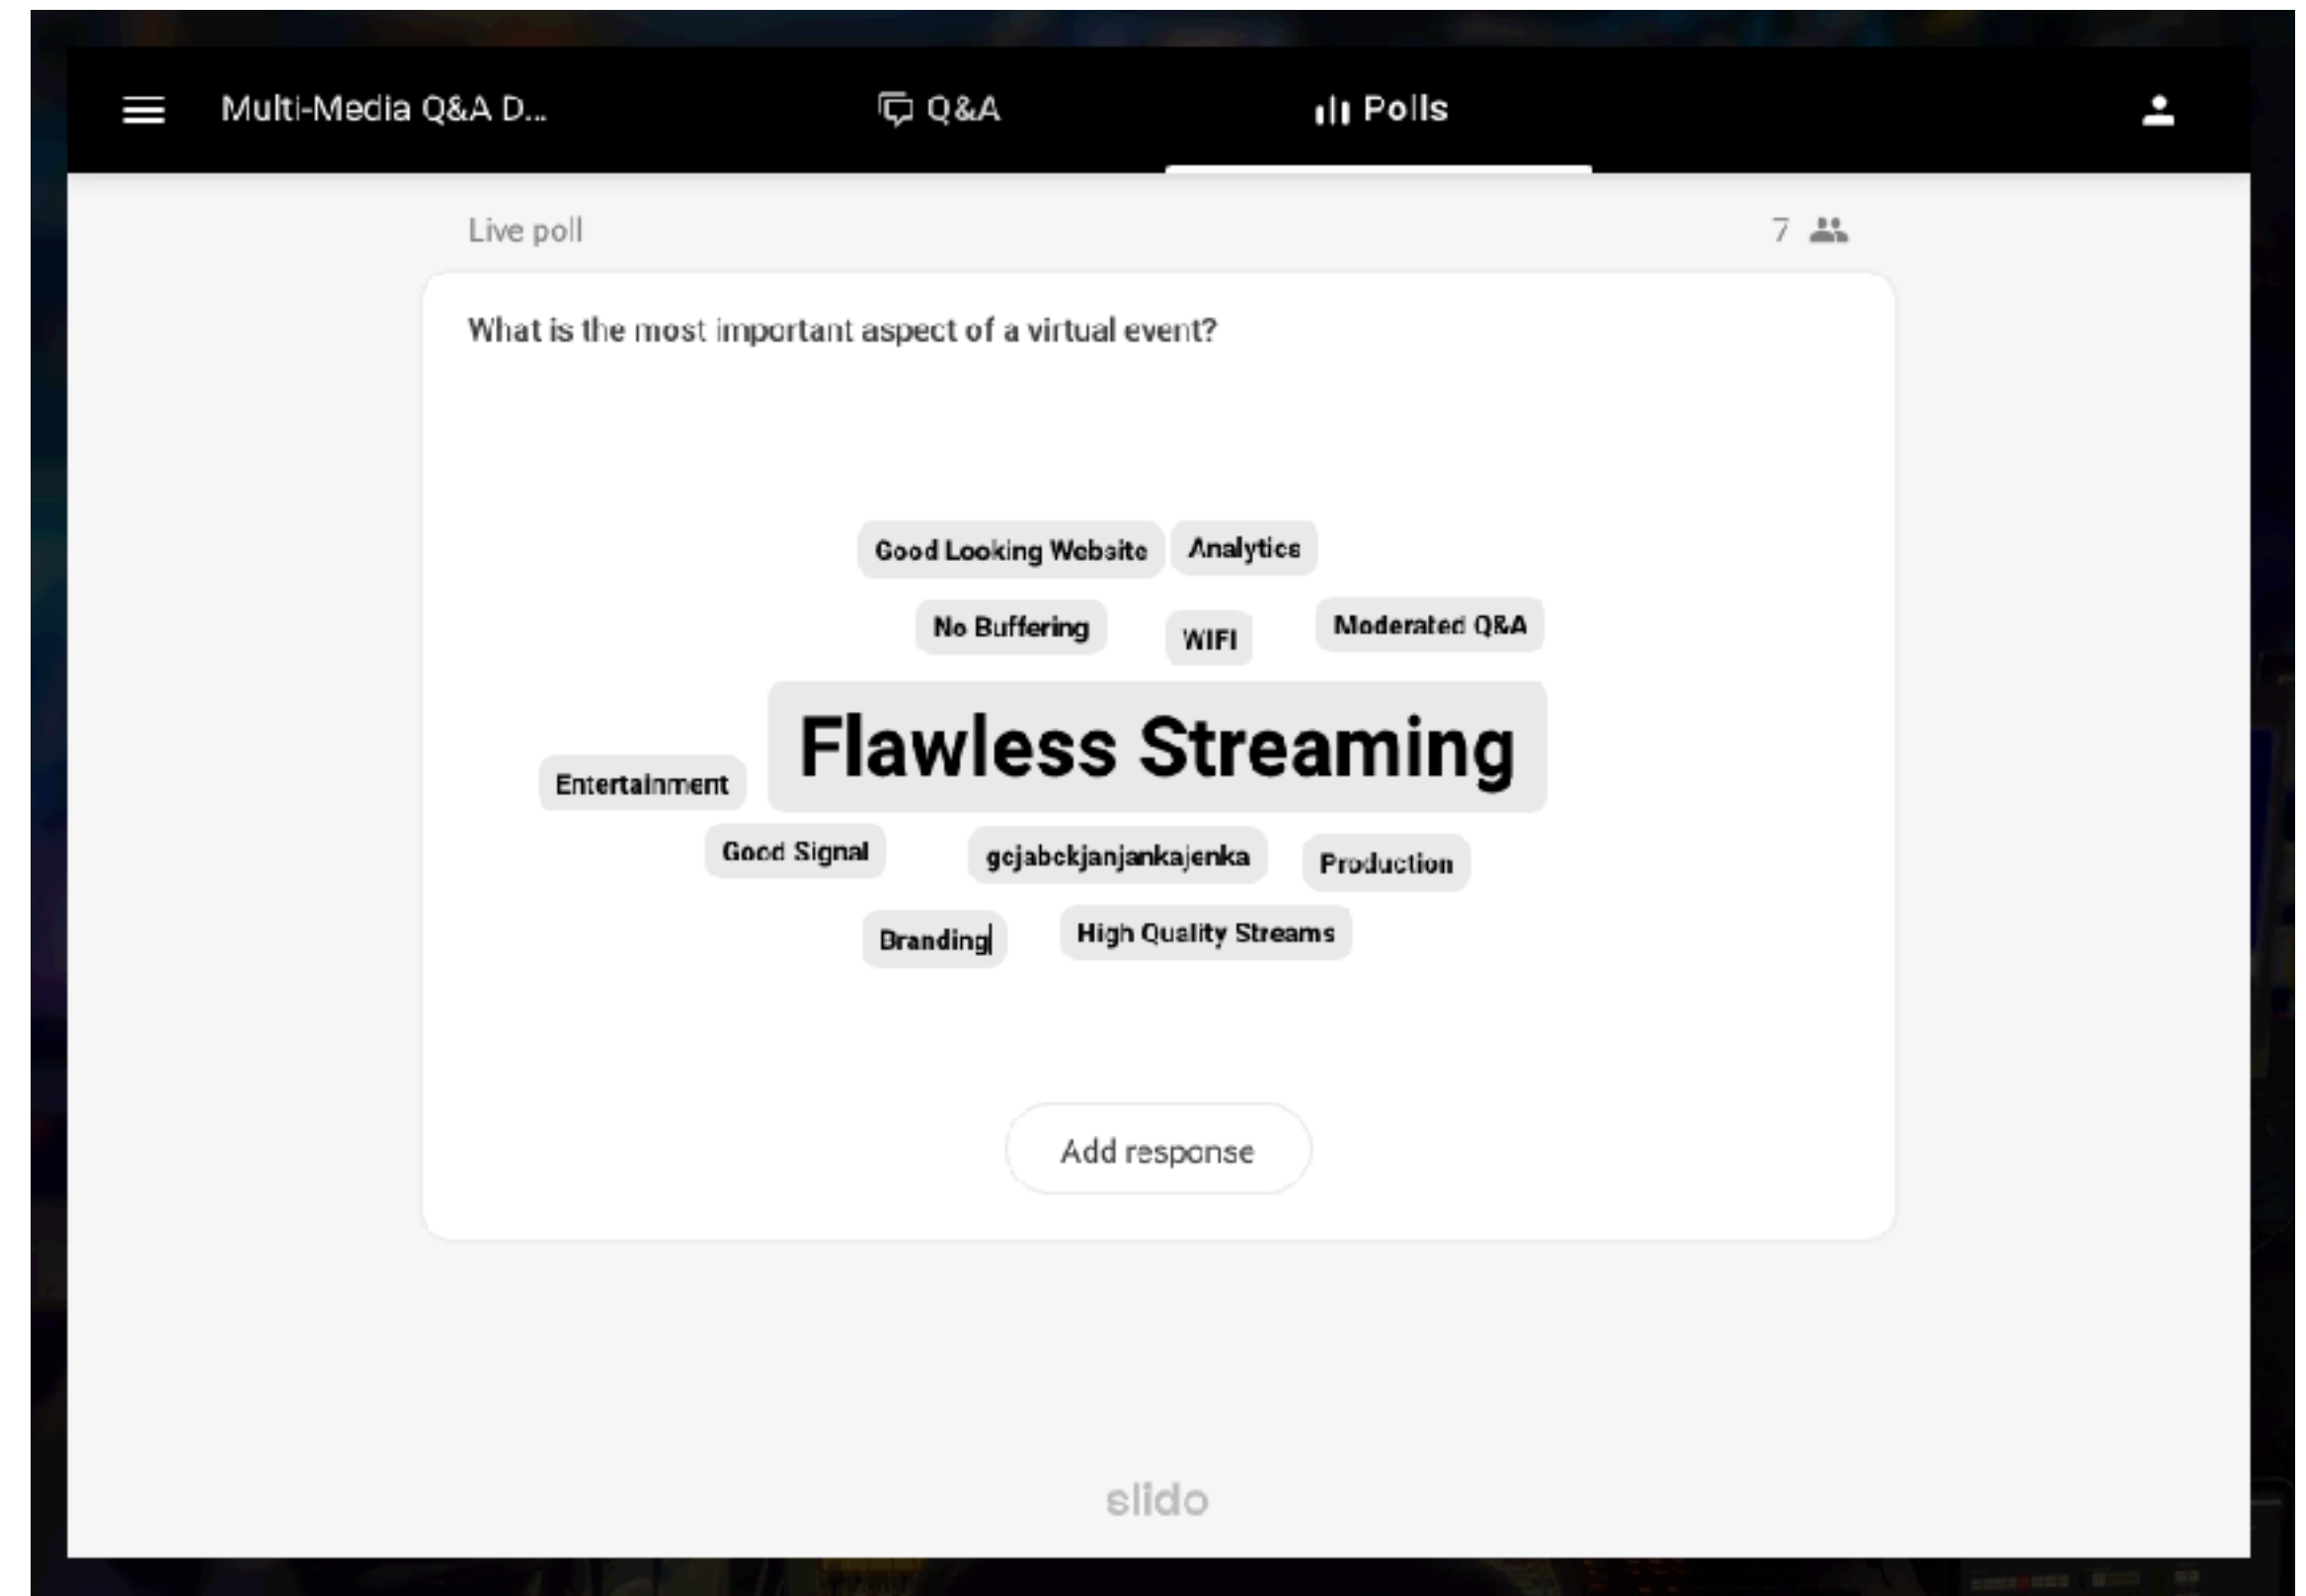

- The moderator can choose to reveal the answers of the polls to the audience.
- The answers display as bars and the bar colour will be the secondary colour (In this case black)

Other Poll Types

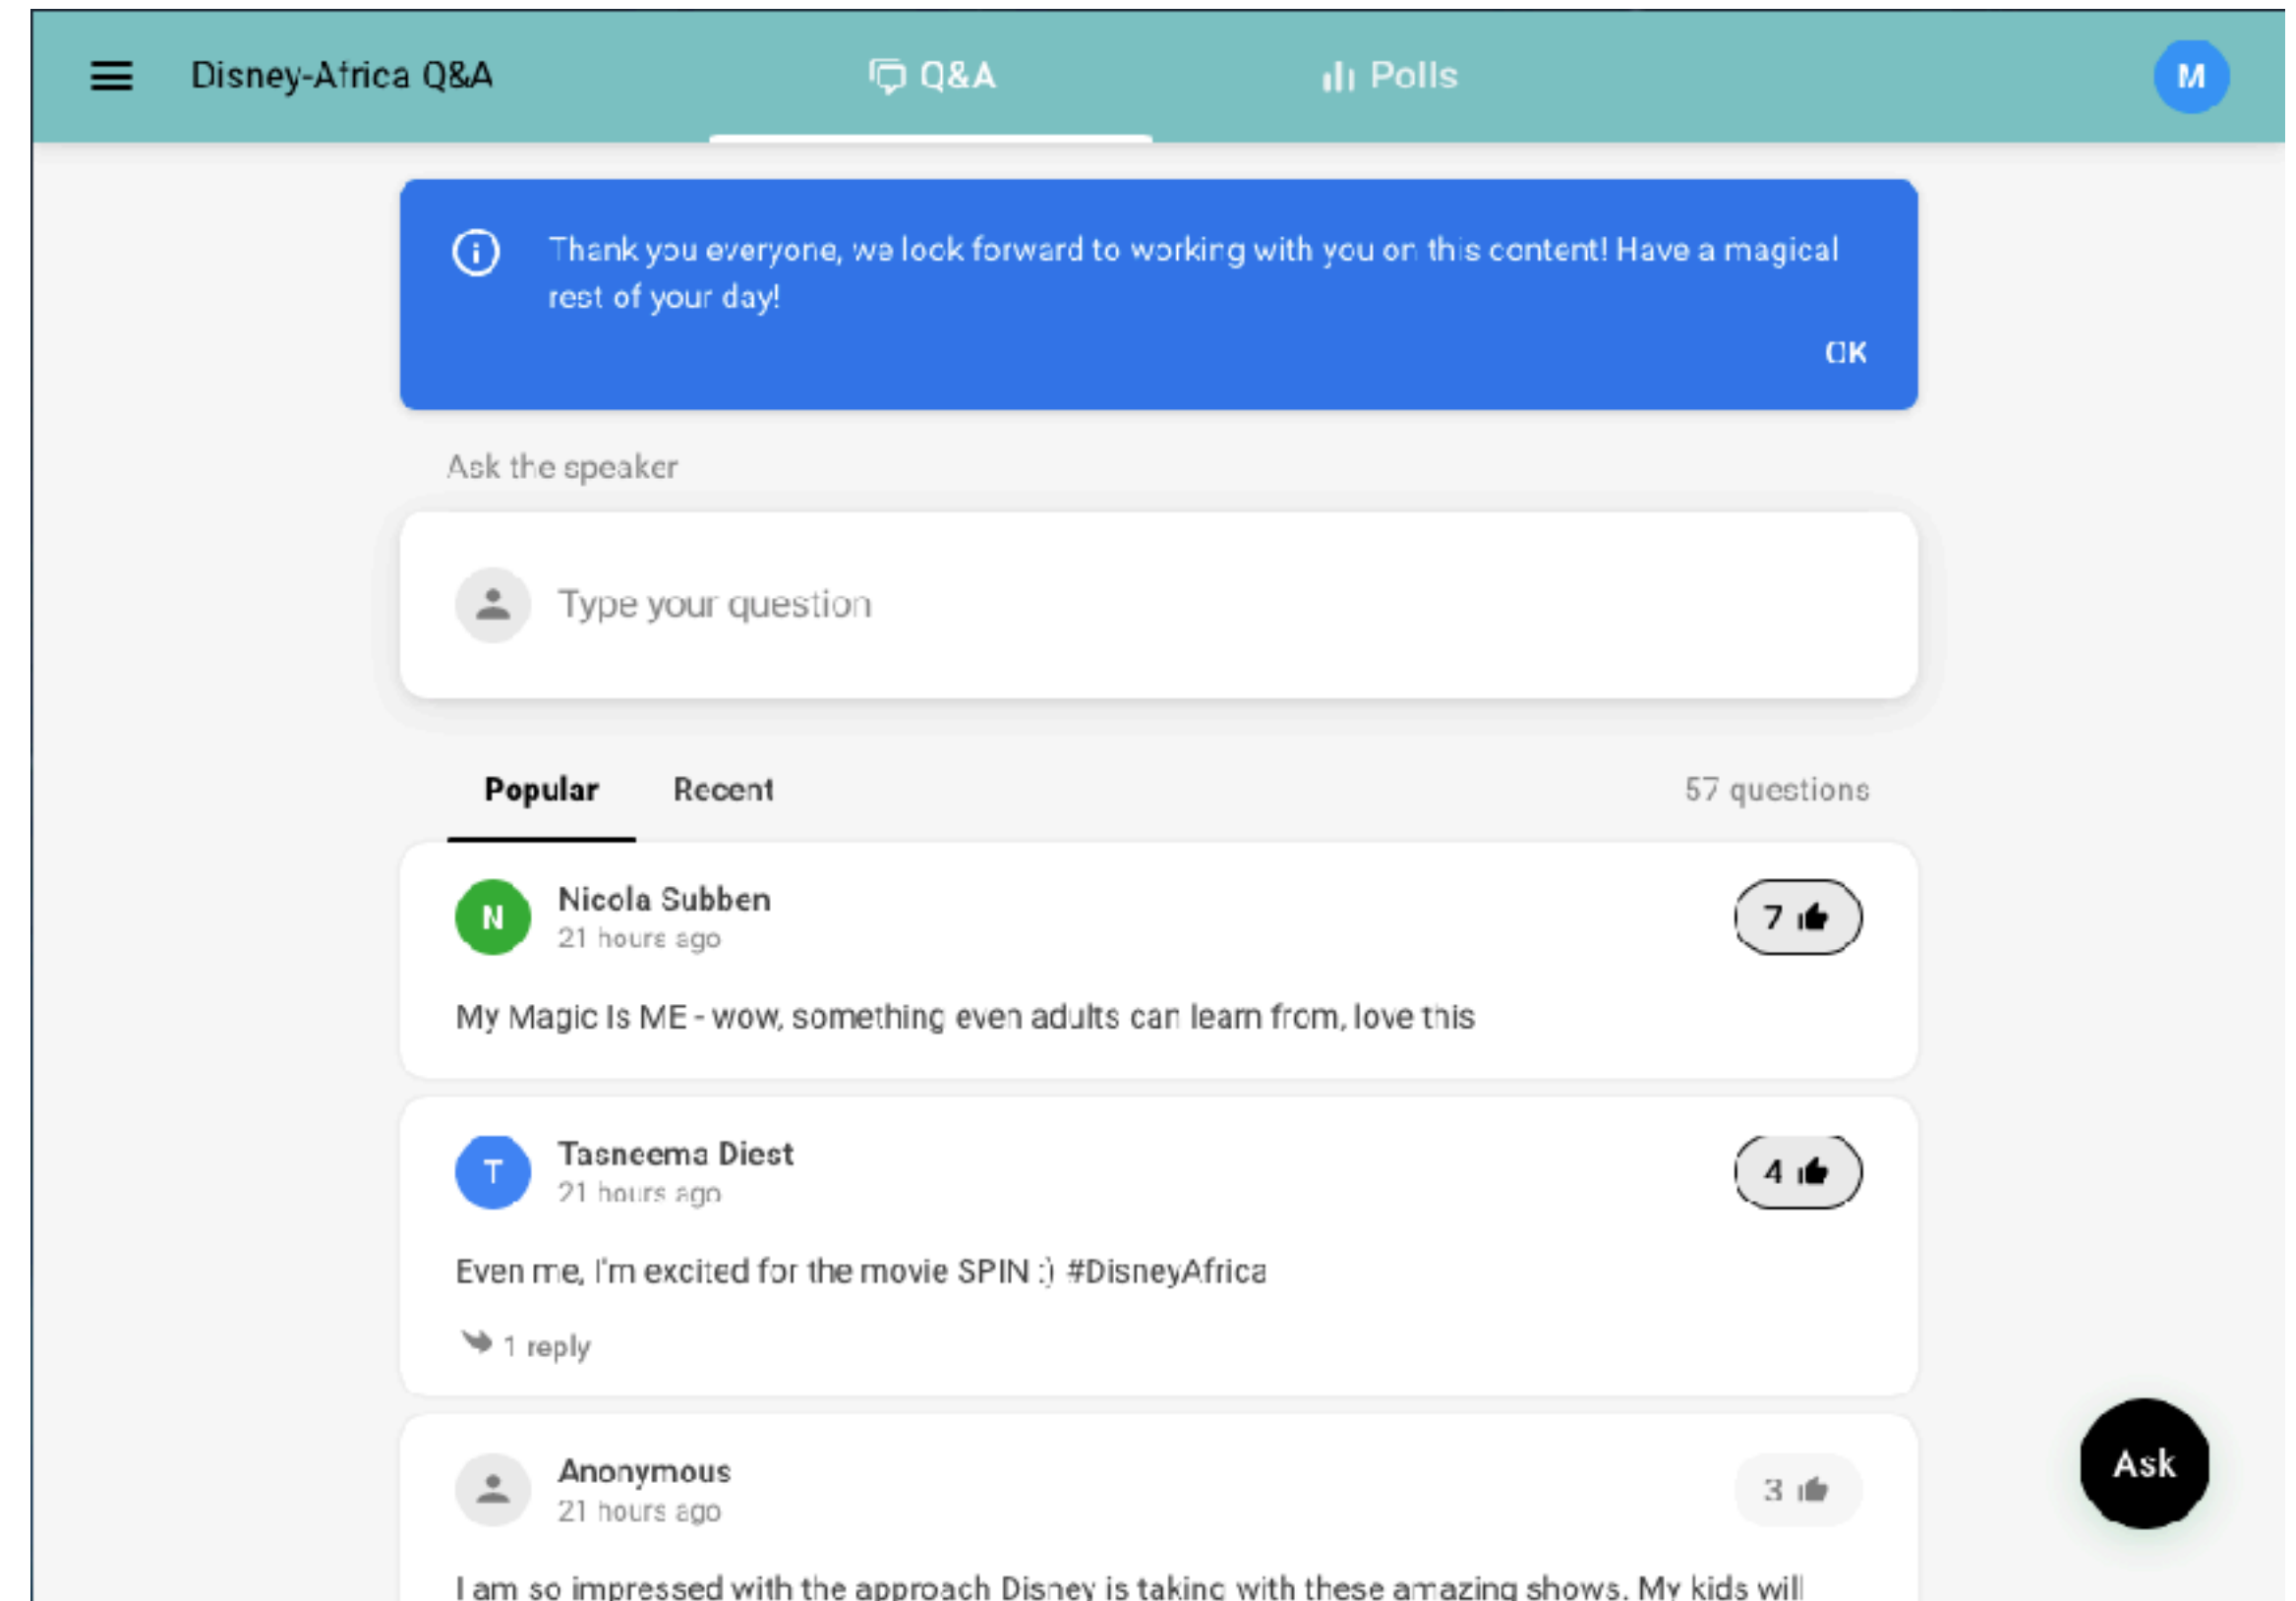

(Optional)

- During the event you can choose to host multiple choice polls, word clouds, quizzes, Rankings, Open Text Surveys and Ratings
- Each Poll type has a unique info graphic display. This display will draw from the theme colours.

Announcement Bubble (Optional)

- The announcement bubble appears at the top of the chat.
- The colour of this bubble is not customisable.

Welcome Screen

(Optional)

- This screen will display the event name and main event logo.
- The colours of this screen and the green button are not customisable.
